2. INTRODUCTION

2.1 Health Sector in the UAE

The health sector in the country has enjoyed many developments that have taken place in all its components and components, thanks to the continuous directives of the rational leadership, which always emphasizes the need to provide all medical services to all, in a distinct and high quality, through the Ministry of Health and Community Protection, which in turn develops plans and strategies The country's health national Which is reflected positively on the health and safety of citizens and residents on the territory of the state. In coordination with state institutions and other bodies that provide health services, these bodies are:

Entity	Services
Ministry of Presidential Affairs (MOPA)	They provide health treatment services through (4) hospitals distributed across emirates of Umm Al Quwain and Ras Al Khaimah (which were opened at the beginning of 2015) and Ajman (starting from the year 2017) in order to provide highly specialized treatment services such as oncology, cardiovascular surgery, neurosurgery and general treatment.
Ministry of Interior (MOI)	They provide services to police employees and their families, whether in the Ministry of the Interior or in the general police departments, and a number of clinics follow.
Department of Health – Abu Dhabi (DOH)	It was established in 2001 to include Sheikh Khalifa Medical City, Al Rahba Hospital, Al Mafraq Hospital in Abu Dhabi, Tawam Hospital in Al Ain and many other distinguished facilities. The IVF laboratory and the reference center for registering cancer cases in Tawam Hospital are among the most advanced models in the country.
Mubadala Health Services Company - Abu Dhabi	They provide health services through two hospitals, Healthpoint and Cleveland.
Dubai Health Authority (DHA)	It was established in 1972 and includes a number of hospitals and health institutions affiliated with the Dubai government, which are equipped with the latest international standards. The Thalassemia and Genetics Center located in Latifa Hospital (formerly Al Wasl) is one of the active and leading centers in the Middle East, in addition to Al Jalila Hospital, which specializes in pediatric treatments.
Onshore Petroleum Areas	They provide medical services to workers in the sector and their families, as (ADNOC) provides a main hospital (Ruwais) to which

some clinics are affiliated in different places such as Ruwais and Madinat Zayed etc. It is covered by helicopters and ambulances, and it also provides specialized services for occupational health and preventive measures.

Private Sector

While the Ministry and Abu Dhabi Health Authority and the Dubai Health Authority have a large number of medical facilities in the private sector, ranging from hospitals, clinics, specialized health centers, multiple centers and rehabilitation centers.

The Health Policies and Licensing Sector in the Ministry of Health and Prevention plays a major role in coordinating with the private sector to achieve the integration of health services within the framework of the federal rules regulating health professions in the private sector, which are:

Federal Law No. 17 of 1975 AD regarding the practice of the profession of human medicine.

Federal Law No. 4 of 1983 regarding the practice of the profession of pharmacy and pharmaceutical institutions

Federal Law No. 4 of 2015 regarding licensing private health facilities

It contributes to defining the types of facilities and conditions required for the place, workers, equipment and means of supervision in order to ensure the safety and accuracy of implementing the regulating laws and thus achieving efficiency.

2.2 Ministry of Health & Prevention Strategy

2.2.1 Vision

An effective and sustainable health system for a happy society.

2.2.2 Message

Promoting community health by providing comprehensive and innovative health services with equality and international standards and performing the regulatory and oversight role in the health sector through an advanced and integrated health legislative system.

2.2.3 Value

- **Patient First** - The patient is the center of our attention and care.
- **Excellence and leadership** - Health care according to the highest standards of excellence and professionalism and achieving leadership in the health field.
- **Initiative and Productivity** - Effective and proactive contribution to achieve the best results.
- **Accountability** - Take responsibility at all levels and take the necessary measures to ensure outstanding performance.
- **Respect** - Appreciation for the rights and privacy of all concerned.
- **Innovation** - Adopting creative thinking as a way of life to ensure readiness for the future.
- **Teamwork** - Teamwork and integration with all stakeholders.
- **Community Happiness** - Providing comprehensive and integrated health care that exceeds expectations for a happy society.

2.2.4 Strategic Goals

- **1st Goal** - Providing comprehensive and integrated health care in innovative and sustainable ways that ensure community protection from diseases.
- **2nd Goal** - Developing health information systems and applying international standards in managing infrastructure in health facilities.
- **3rd Goal** - Building quality, therapeutic, health and drug safety systems according to international standards.
- **4th Goal** - Providing a vital legislative framework and governance and provide distinguished regulatory and oversight services to the health sector.
- **5th Goal** - Ensuring that all administrative services are provided in accordance with standards of quality, efficiency and transparency.

- **6th Goal** - Establishing a culture of innovation in the institutional work environment.

3. CHAPTER ONE : INDICATORS OF THE NATIONAL AGENDA FOR HEALTH SECTOR IN THE STATE

Overview: The National Agenda seeks to consolidate the preventive aspect, reduce the rate of lifestyle-related diseases, and develop the readiness of the health system to deal with epidemics and health risks, in order to achieve a healthy and long life for the Emirati community.

3.1 National Agenda Indicators

The tables below show the indicators of the national agenda for the health sector in the country

Indicator	Prevalence of smoking any tobacco product (males)
Definition	An indicator that measures the percentage of cigarette consumption and daily tobacco products among members of society of different age groups.
Value	15.70
Unit	Percent (%)
Data Source	National Health Survey 2018

Indicator	Prevalence of smoking any tobacco product (females)
Definition	An indicator that measures the percentage of cigarette consumption and daily tobacco products among members of society of different age groups.
Value	2.40
Unit	Percent (%)

Data Source National Health Survey 2018

Indicator	Number of nurse practitioners per 1000 population
Definition	An indicator that measures the average number of nurses per 1000 population.
Value	5.90
Unit	Nurse / 1000 population
Data Source	Reported Country - MOHAP 2019

Indicator	Number of medical doctors per 1000 population
Definition	An indicator that measures the average number of practicing physicians & surgeons per 1000 population (includes general medicine and all specialties except for dentistry).
Value	2.67
Unit	Medical Doctor / 1000 population
Data Source	Reported Country - MOHAP 2019

Indicator	Percentage of children who are obese
Definition	An indicator that measures the number of obese children in relation to the total number of children in UAE population in the age groups 5-17 years. The approved definition of obesity in children is: children who show a standard deviation higher than the correlation between mean weight and height by +2 degrees and above according to special growth charts The World Health Organization for a child's age versus body mass.
Value	17.30
Unit	Percent (%)

Data Source Comprehensive examination for school students - 2019-2020

Indicator	Percentage of the population with diabetes
Definition	An indicator that measures the number of people with diabetes in relation to the population in the United Arab Emirates within the age groups from 20 to 79 years (these age groups were determined to correspond to the age groups approved by the World Diabetes Federation)
Value	11.80
Unit	Percent (%)
Data Source	National Health Survey 2018

Indicator	The number of cancer deaths per 100,000 population
Definition	An indicator that measures the number of cancer deaths per 100,000 population.
Value	33.30
Unit	Deaths per 100,000 population
Data Source	Reported Country - MOHAP 2019

Indicator	The number of coronary heart disease deaths per 100,000 population
Definition	An Indicator that measures the number of deaths from cardiovascular disease per 100,000 population
Value	74.20
Unit	Deaths per 100,000 population

Data Source Reported Country - MOHAP 2019

Indicator	Healthcare Quality Index
Definition	A composite indicator that measures the level of health care quality from (3) axes: primary health care outcomes, preventive health care infrastructure, and satisfaction with physical and mental health care.
Value	42
Unit	Rank
Data Source	Legatum Report 2021

Indicator	Percentage of health facilities that meet the accreditation standards
Definition	An indicator that measures the percentage of government and private hospitals that meet national and international accreditation standards (a country-specific national indicator).
Value	87.70
Unit	Percent (%)
Data Source	Reported Country - MOHAP 2021

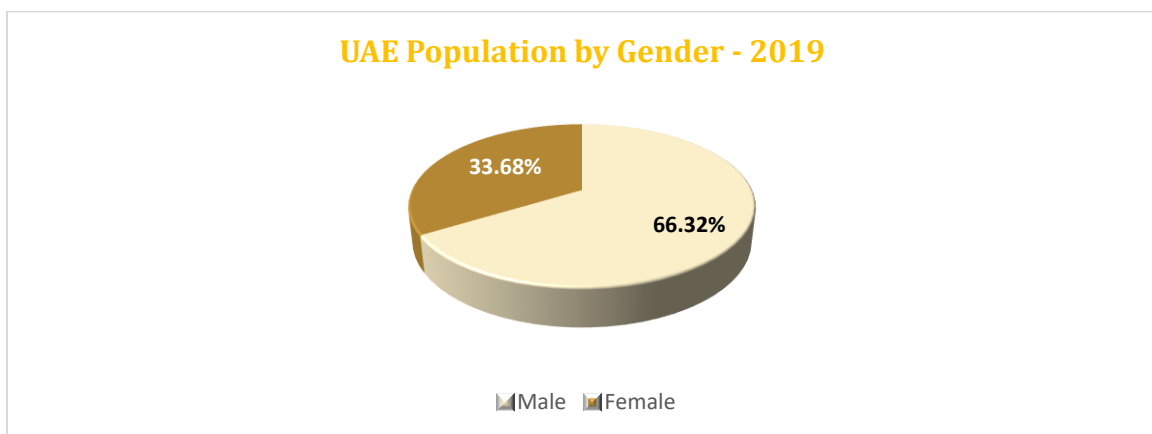

Indicator	Average healthy life expectancy
Definition	An indicator that measures the average life expectancy for a healthy life.
Value	66.70
Unit	Years

4. CHAPTER TWO : POPULATION AND VITAL STATISTICS

4.1 UAE Population by Gender, 2019

The population of the United Arab Emirates bifurcated by Gender for year 2019 is presented below;

Population - 2019		Total
Male	Female	
6,302,724	3,201,014	9,503,738

****Source** – Federal Competitiveness and Statistics Center – Open Data

4.2 UAE Births and Deaths, 2019

4.2.1 Crude Birth Rate

The number of registered live births reached (94,588) live births in 2019. Citizens constituted 34.59% of the total births and males accounts for (51.58%) of the total citizen births, compared to approximately (48.42%) of females. With a total crude birth rate (10.17) live births per thousand population in 2019. The stillbirth rate was 4.44 per thousand live births in 2019.

4.2.2 Births and Deaths in the UAE for the year 2019

Data	Citizen				Non-Citizen				Total			
	Male	Female	Not Known	Total	Male	Female	Not Known	Total	Male	Female	Not Known	Total
Registered Live Births	16892	15831	0	32723	31905	29960	0	61865	48797	45791	0	94588
Registered Still Births	60	53	2	115	149	139	19	307	209	192	21	422
Total Registered Deaths	1420	995	1	2416	4900	1688	2	6590	6320	2683	3	9006

Registered Still Birth Rate by Emirate - 2019

	Abu Dhabi	Dubai	Sharjah	Ajman	UAQ	RAK	Fujairah
■ Still Birth Rate	4.17	4.37	4.31	5.17	5.84	6.12	4.47

4.2.3 Newborn Mortality Rate

The neonatal mortality rate decreased from 3.63 per thousand live births in 2018 to 3.59 per thousand live births in 2019. The decrease in the mortality rate is linked to many factors, especially the primary health care for children and newborns, as well as the prevention and treatment of childhood diseases, improving nutrition, immunization coverage and services provided to mothers and children.

4.2.4 Infant Mortality Rate

In 2019, the infant mortality rate was 5.24 per 1,000 live births, with the highest infant mortality rate in the Emirate of Ras Al Khaimah and the lowest in the Emirate of Umm Al Quwain.

4.2.5 Children under 5 years old Mortality Rate

In United Arab Emirates the mortality rate for children under five years of age increased from 1.6 per 1,000 live births in 2018 to 6.52 per live births in 2019.

4.2.6 Deaths

The number of crude deaths recorded in the country reached (9006) deaths, with a crude rate of (0.95) per thousand population, as this indicator is considered one of the lowest recorded global indicators.

5. CHAPTER THREE : HUMAN HEALTH WORKFORCE

The development of the workforce in the health field is imperative due to the development of health services in the Ministry of Health and Prevention. The number of workers in the health sector in the country at the end of December 2019 reached (125,887) employees, including (25,414) Medical Doctors, (6576) Dentists, (11827) pharmacists and (56,142) Nurses distributed per emirates of the country according to the table below;

5.1 Overall UAE Health Workforce per emirate

Table – Technical manpower by Emirate for the year 2019

Emirate	Medical Doctors	Dentists	Pharmacists	Nurses	Technicians	Total
Abu Dhabi	10169	2348	4241	27520	10148	54426
Dubai	10011	2597	4570	18741	10171	46090
Sharjah	2,757	889	1,621	4,861	2,780	12908
Ajman	878	307	643	1593	800	4221

Ras Al Khaimah	33562	154597
Fujairah	27019	84327
Total	806077	2581248.442

7.4 Hospital services for patients residing in the country for year 2019, By Sector

The table below shows the number of hospital services for patients admitted in hospitals at UAE level for the year 2019, according to the Government and Private sectors.

Hospital services for inpatients in UAE - 2019		
Sector	Entry Cases	Days of Stay
Governmental	322176	1498233.213
Private	483901	1083015.229
Total	806077	2581248.442

8. CHAPTER SIX : HEALTHCARE FACILITIES

Since its establishment, the United Arab Emirates has been keen to provide the best health services and provide high-quality care up to international standards, including curative, preventive and promotional services, in addition to implementing strategic programs to combat chronic and communicable diseases and care for children and mothers, through the implementation of health strategies facing Challenges in using modern health technologies.

8.1 Overall UAE Health Care Facilities

8.1.1 Number of Health Care Facilities by Medical District 2019

Emirate	Sector		Total Facilities
	Government	Private	
Abu Dhabi	530	1194	1724
Dubai	68	1996	2064
Sharjah	61	817	878
Ajman	14	235	249
UAQ	8	41	49
RAK	32	227	259
Fujairah	20	137	157
Total	733	4647	5380

8.1.2 Number of Health Care Facilities by Medical District 2019

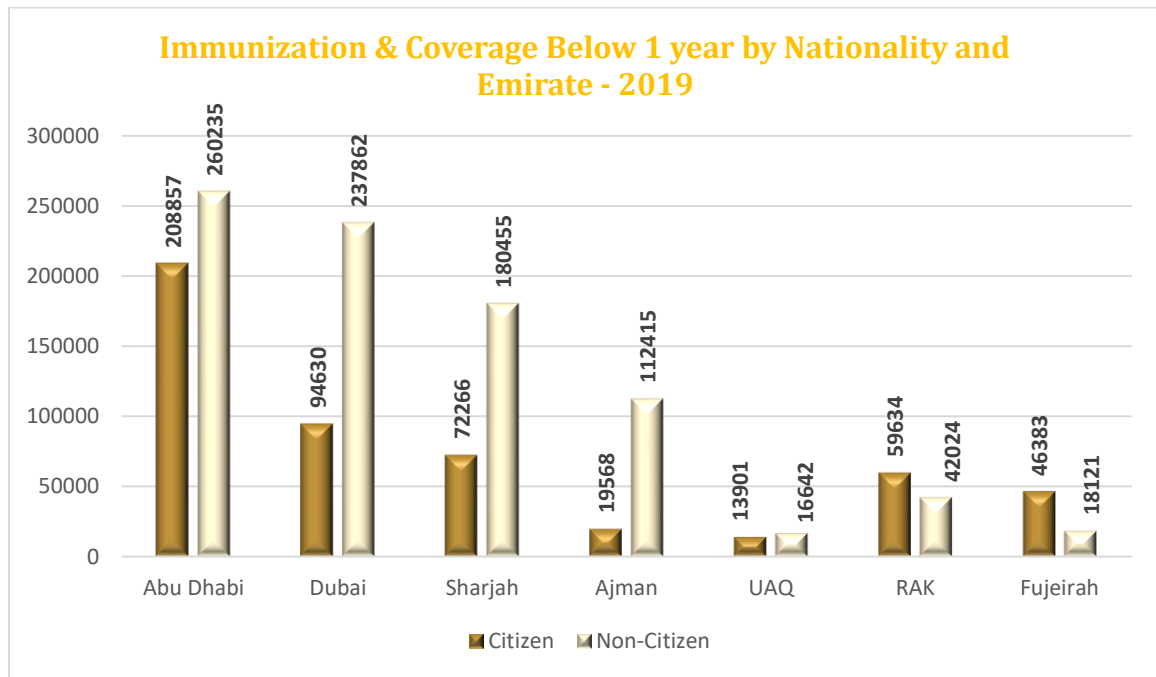

8.2 Basic vaccinations in primary health care centers by emirate

The Ministry of Health and Prevention is keen to provide vaccinations in accordance with the national immunization program for children through an experienced medical staff and according to health care quality standards, and in implementation of the global goals and strategies related to immunization programs, established by the World Health Organization, the United Nations Children’s Fund “UNICEF” and the Global Center for Control on infectious diseases, and in order to immunize society from the danger and harm of infectious diseases.

During the year 2018, the primary health care centers of the Ministry of Health and Prevention achieved (179,538) children to get vaccinated, at maternal and child care, and specialized clinics, which constitutes (18%) of the total number of visitors to the health centers.

8.3 Frequency rates for child vaccination services by nationality in the medical district for the year 2019

9. CHAPTER SEVEN : PREVENTIVE MEDICINE SERVICES

9.1 Overview of Preventive Medicine centers in Medical Districts

Preventive medicine departments and centers in the various medical regions implement preventive activities and programs, as they supervise the implementation of preventive programs, health education and communicable disease control programs, which include more than 36 infectious diseases such as:

- Immigrant Disease Control Program.
- Anti-Acquired Immunodeficiency Syndrome Program.
- Malaria control program
- The Expanded Immunization Program, which has achieved remarkable growth recently, which has led to a reduction in the incidence of most of the child diseases targeted by the program.
- The polio eradication program, the measles eradication program, and others, and as a natural result of the high rates of vaccination coverage, was a noticeable decrease in the incidence of diseases, as the country did not witness any cases of diphtheria, and congenital tetanus was eradicated from the country, so no infections were recorded during these years.

In recent years, in addition to the eradication of poliomyelitis, which has not been recorded for nearly 20 years, and the figure shows the incidence of communicable

Percentage of Some Communicable Diseases

9.2 Services of preventive medicine centers at Ministry of Health and Prevention

9.2.1 Communicable diseases recorded by disease and region for 2019
