1. Introduction

1.1. Overview of Riayati Clinical Viewer

Riayati Clinical Viewer is a healthcare information platform designed to provide authorized healthcare professionals with access to consolidated patient clinical information across healthcare facilities in the Emirate. The viewer enables users to review important patient health data including conditions, allergies, medications, laboratory results, diagnostic studies, procedures, and encounter history in a centralized interface. By enabling seamless access to patient records, Riayati supports improved clinical decision-making, continuity of care, and enhanced patient safety.

1.2 Introduction to Riayati NUMR

The National Unified Medical Record (NUMR) is a unique patient identifier assigned within the Riayati system. It links patient health records across multiple healthcare providers and facilities, allowing healthcare professionals to view a unified patient history. The NUMR ensures that patient clinical information from different healthcare encounters can be securely accessed and integrated within the Riayati Clinical Viewer, enabling a comprehensive view of patient health data.

1.3 Document Purpose

The purpose of this document is to provide a comprehensive user guide for Nurses on how to access and use the Riayati Clinical Viewer. It outlines the key functionalities of the system, navigation steps, and instructions for viewing patient clinical data available through the Riayati platform.

1.4 Intended Audience

This user manual is intended for Nurses who require access to patient clinical information through the Riayati Clinical Viewer. The document serves as a reference guide to assist users in understanding system features, accessing patient data, and navigating various sections of the viewer.

1.5 Document Objectives

The objective of this document is to support users in effectively utilizing the Riayati Clinical Viewer by:

- Providing an overview of the system and its functionalities.
- Explaining how to access and navigate the platform.
- Guiding users on how to view and interpret patient clinical information available in the system.
- Supporting efficient use of the viewer to facilitate informed clinical decisions and improved patient care.

2. System Access and Navigation

2.1. Login Process

Access to the Riayati Clinical Viewer is integrated within the hospital's Electronic Medical Record (EMR) system. Users do not need a separate login to access the viewer.

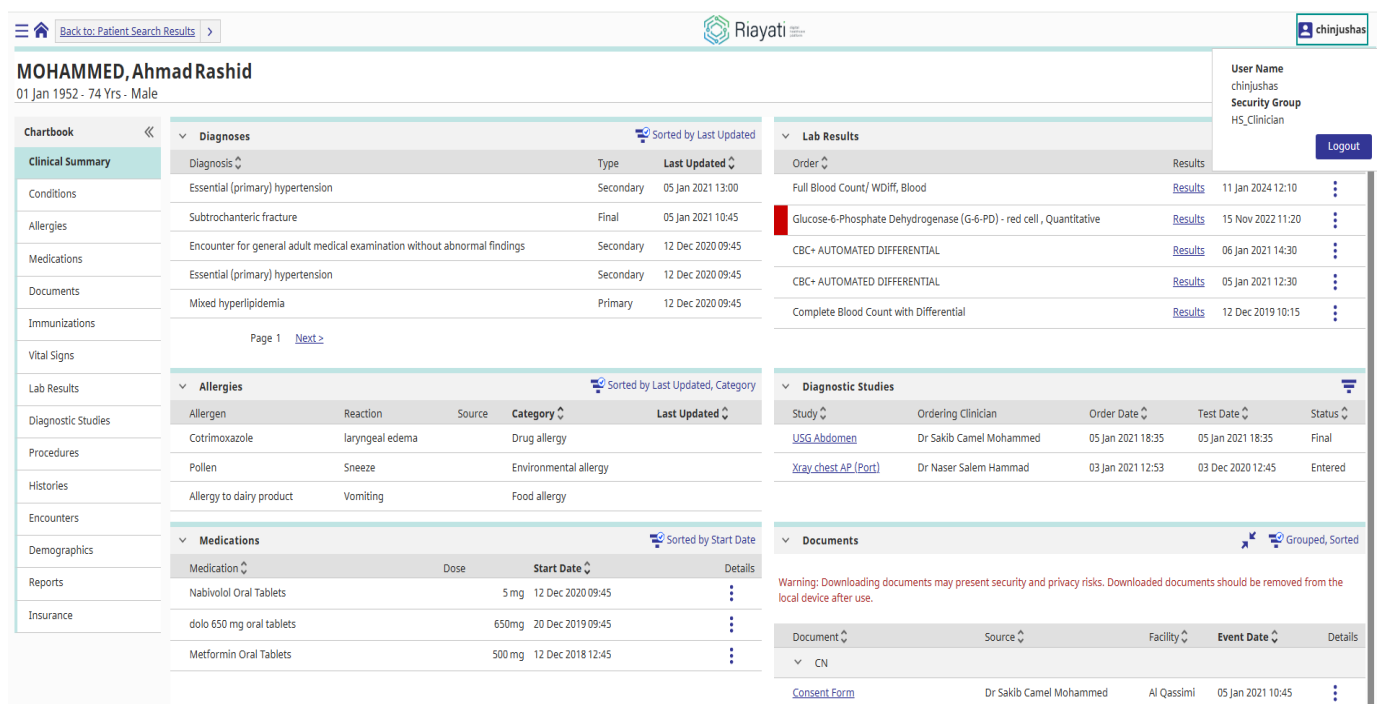

To access the Riayati Clinical Viewer, first open the patient chart or patient record within the EMR system. Once the patient record is open, locate the Riayati logo or the Riayati Clinical Viewer option on the EMR interface. The exact placement of the Riayati logo may vary depending on the configuration and layout of the EMR screen used by the healthcare facility.

Selecting the Riayati logo or Clinical Viewer option will launch the Riayati Clinical Viewer for the selected patient, allowing the user to access the patient's consolidated clinical information.

2.2. Navigation within the Clinical Viewer

- Clicking the Riayati logo will open the Riayati Clinical Viewer, displaying the patient summary for the selected patient.
- In the top-right corner of the Clinical Viewer, users can view their message inbox, along with their name and assigned role. The information and sections available within the Clinical Viewer are determined by the user's assigned role. Therefore, it is important to ensure that the appropriate role is selected, as this determines the level of access and the clinical information that can be viewed within the system.

4. Override Consent

4.1. Overview of Override Patient Consent Policies

- Override consent policy enables physicians to search for patients who have chosen to “Opt-Out” and prevent providers from accessing their clinical information. Such patients will not be displayed in the search results. However, a label will show that there may be records filtered due to the consent policy.

4.2. Different Patient Consent Policies in Riayati

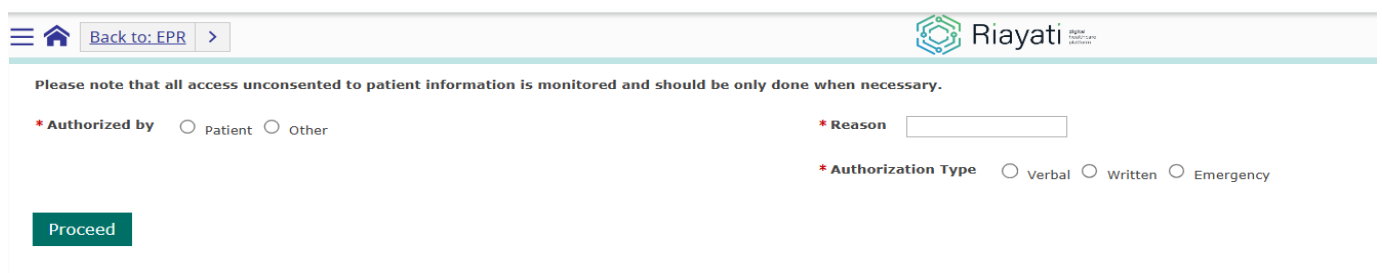

- Below are the different consent policies applicable in Riayati programme:
 1. **Global Opt-Out:** The patient has chosen not to share any of his clinical information with other providers. You can only view patient data by overriding the consent policy.
 2. **Facility Opt-Out:** The patient has chosen not to share his clinical information from a facility to other providers. You can only view patient data from other facilities and view opt-out facilities by overriding the consent policy.
 3. **Provider Opt-Out:** The patient has chosen not to share his clinical information with a specific provider. You can view all the patient clinical records except that provider. You can view opt-out patient data by overriding the consent policy.

4.3. Navigating through Override Consent

- A patient can “opt-out” of sharing his clinical information with providers. However, in certain scenarios like emergencies, you may need to access patient records. In such cases, you can override the consent policy to access patient records.
- To open the Clinical Viewer, ensure that the patient chart or patient record is open in your EMR. Then, locate the Riayati logo. The exact placement of the logo may vary depending on your EMR interface.

- When you click the logo, you will be directed to the patient summary in the Riayati Clinical Viewer. If the patient has opted out of data sharing, the override policy screen will be displayed.
- To override the consent policy, first select the reason for overriding the consent policy. Then select, whether access is *authorized by the patient* or *authorized by other party*. Next, specify how the authorization was provided—for example, whether consent was given orally, in writing, or if the record is being accessed during an emergency where obtaining consent is not possible.

Back to: EPR >

Riayati digital healthcare platform

Please note that all access unconsented to patient information is monitored and should be only done when necessary.

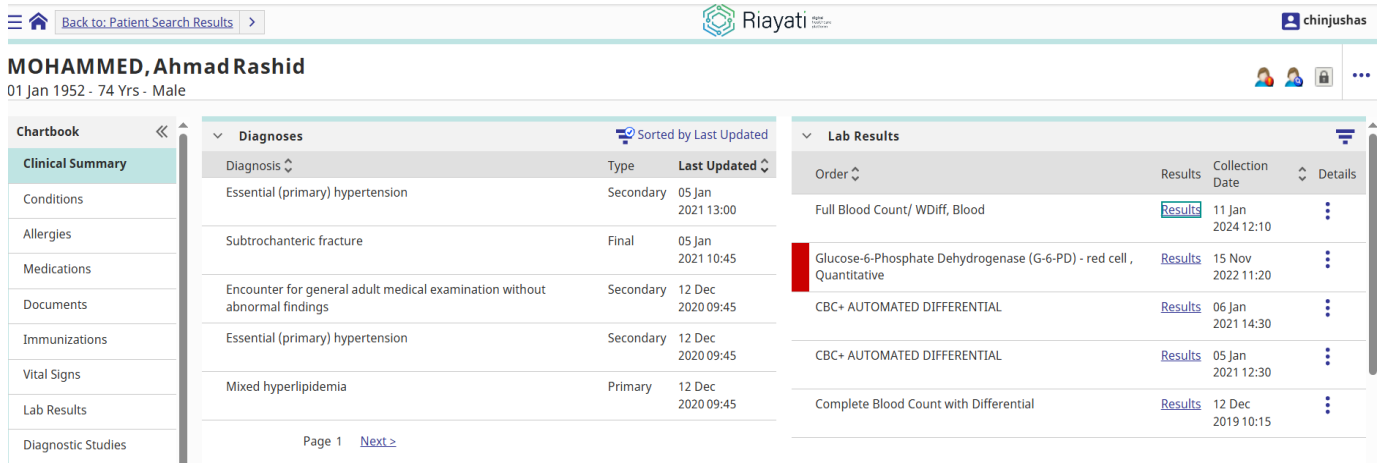

* Authorized by Patient Other

* Reason

* Authorization Type Verbal Written Emergency

Proceed

- Click the Proceed button to continue. You will then be able to view the patient summary, including information from all facilities. As you have overridden the consent policy, sensitive data will also be accessible.

The screenshot shows the Riyati Clinical Viewer interface for patient MOHAMMED, Ahmad Rashid (DOB: 01 Jan 1952, 74 Yrs - Male). The interface includes a navigation menu on the left with options like Clinical Summary, Allergies, Medications, Documents, Immunizations, Vital Signs, Lab Results, and Diagnostic Studies. The main content area is divided into two panels: Diagnoses and Lab Results.

Diagnosis	Type	Last Updated

Complete Blood Count with Differential	Results	12 Dec 2019 10:15	⋮

- If you do not have permission to override the consent policy, an error page—like the example shown below will be displayed.

The screenshot shows an error message box with the following text:

Unable to show the patient

We are unable to show this patient's HIE records at this time.

You may be seeing this message for the following reasons:

- A unique matching record could not be found.
- You may not be authorized to view the patient's record.
- The request was badly formed.

This message is only a warning and does not indicate that there is a problem with your computer or the HIE. If you have any additional questions, please contact your support organization.

- If you still require access to the patient record, please contact a provider who is authorized to override the consent policy.

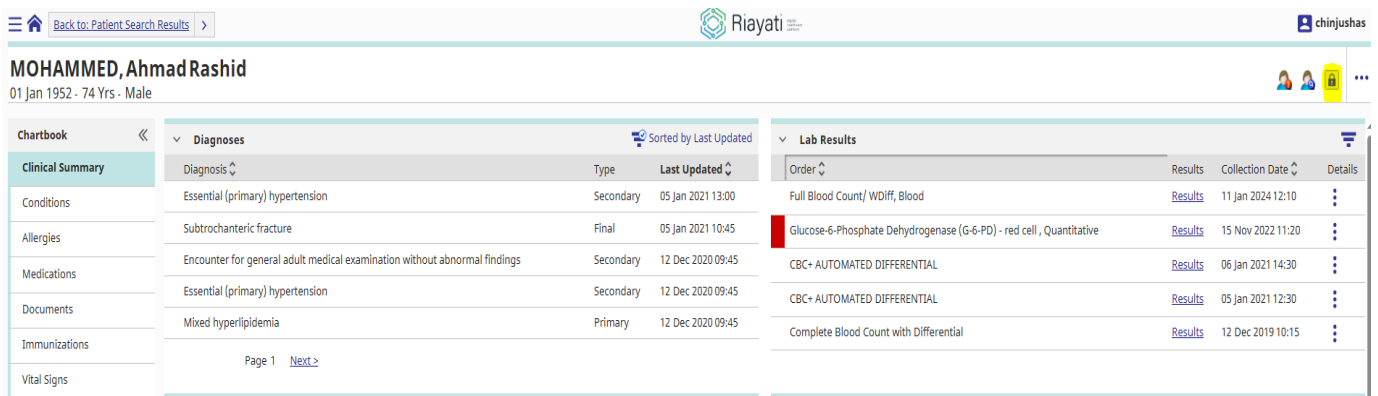

5. Break the Glass

5.1 Overview of Break the Glass

- Not all nurses are authorized to access sensitive patient information. The Break-the-Glass feature allows only authorized nurses to access such information when it is necessary for patient care, such as in emergencies or exceptional situations. This access is strictly controlled, requires justification, and is fully audited to ensure compliance and patient privacy.

5.2 Steps to access sensitive information

- Users can access patient sensitive data using the Break-the-Glass feature.
- Sensitive information includes an individual’s physical health, mental health, and treatment-related details. Access to this information is restricted to authorized providers only. Only physicians and nurses with Break-the-Glass privileges are permitted to view sensitive data.
- In the Clinical Viewer, always ensure that you are viewing the correct patient record by verifying the patient’s demographic details.
- If a patient has sensitive data, then in the patient banner a sensitive record indicator will be visible.

- Once the OTP is successfully verified, click the Proceed button to submit the Break-the-Glass request. Upon submission, you will be redirected to the patient's Clinical Summary page, where the previously restricted sensitive information will be available for viewing.

The screenshot shows the Riayati Clinical Summary page for patient MOHAMMED, Ahmad Rashid (01 Jan 1952 - 74 Yrs - Male). The page is divided into several sections:

- Diagnoses:** A table listing diagnoses such as 'Essential (primary) hypertension', 'Subtrochanteric fracture', and 'Essential (primary) hypertension' with their respective types and last updated dates.
- Allergies:** A table listing allergens like 'Cotrimoxazole' (laryngeal edema) and 'Allergy to dairy product' (vomiting).
- Medications:** A table listing medications such as 'Nabivolol Oral Tablets', 'dolo 650 mg oral tablets', and 'Metformin Oral Tablets' with their doses and start dates.
- Lab Results:** A table listing lab orders like 'Full Blood Count/ WDiff, Blood' and 'Glucose-6-Phosphate Dehydrogenase (G-6-PD) - red cell, Quantitative' with their results and collection dates.
- Diagnostic Studies:** A table listing studies like 'USG Abdomen' and 'Xray chest AP (Port)' with their ordering clinicians and dates.
- Documents:** A table listing documents like 'Consent Form' and 'Discharge Summary' with their sources and dates.

- Click on the result link to view the detailed lab result.

The screenshot shows the Riayati Results Detail page for patient MOHAMMED, Ahmad Rashid (01 Jan 1952 - 74 Yrs - Male). The page displays the following information:

- Order Details:** A table showing order information such as 'Start Date', 'Ordering Clinician', 'Order Status', 'Specimen', 'Collection Date', 'Date Lab Received', 'Result Date', 'Result Status', 'Last Updated', and 'Age at Time of Test'.
- Test Results Table:** A table with columns for Test Item, Flag, Value, Units, Reference Range, Test Item Status, Comments, Sensitivities, Other Flags, Collection Date, and Performed At. It lists various blood count tests like 'Red Cell Count', 'Haemoglobin', 'Haematocrit', 'MCV', 'MCH', 'MCHC', and 'RDW'.

- After the Break-the-Glass process is completed, the Sensitive Record indicator will be disabled. You may continue accessing sensitive information until you close the Clinical Viewer. Please ensure that the Break-the-Glass feature is used only when necessary
- All unauthorized access to patient sensitive data is monitored and audited.

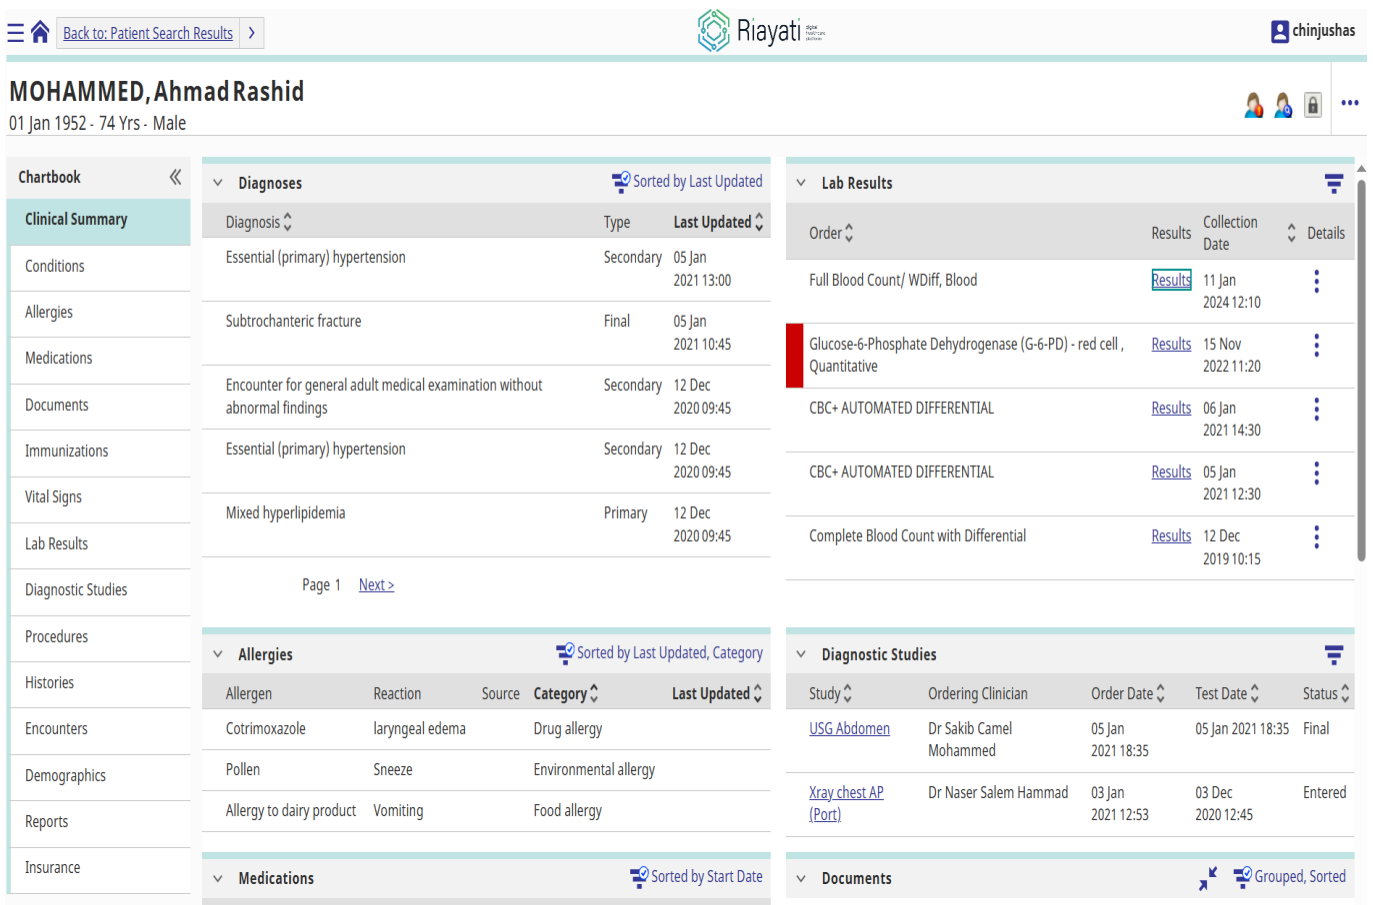

6. Clinical Summary

6.1 Overview of Clinical Summary

- The Clinical Summary provides a quick snapshot of the patient's overall clinical status within the HIE. It includes key information such as diagnoses, lab results, allergies, diagnostics, medications, and clinical documents. Each section offers detailed data that can be accessed through the *Details* option or by selecting the relevant links.

6.2 Navigating the Clinical Summary

- When you log into the HIE, the system will open to the Clinical Summary page by default. The Clinical Summary provides an overview of the patient's current health status and overall clinical condition.
- The Clinical Summary consists of six sections: Diagnosis, Lab Results, Allergy, Diagnostics, Medications, and Documents.
- Patient diagnoses are displayed under diagnosis section of clinical summary. Users can view diagnosis name, type and Last Updated. By default, five diagnoses are displayed in the clinical summary. To view more records, navigate to next or earlier page using page link found at the bottom of the widget. Click on the sort options link on the top right corner of the widget to view diagnosis sort options. Diagnosis can be sorted by date, time and or status. Users can alternatively sort diagnoses by recorded date by clicking on the date header on the grid.

USG WHOLE ABDOMEN

Liver is normal in size, shape, contour and shows normal echogenicity with homogeneous echotexture. No focal SOL or dilatation of IHBR seen.
 CBD is normal in calibre, measure approx: 2.9 mm.
 PV at porta measures approx. 10.6 mm in diameter, and shows normal respiratory variation in calibre.
 Gallbladder is well distended and shows normal wall thickness, with anechoic lumen.
 Pancreas appears normal in size, shape and shows homogeneous echotexture. MPD is not dilated. Peripancreatic planes are normal.
 Spleen is normal in size, shape and echotexture. No focal or diffuse lesion is seen.
 Right kidney measures 9.6 x 4.3 cm.
 Left kidney measures 9.1 x 4.1 cm.
 Both kidneys are normal in size, shape, position, outline and echogenicity. Corticomedullary differentiation is maintained in both kidneys, with normal cortical thickness. No calculus or hydronephrosis is seen on either side.

- In the Medications section, you can view the patient’s prescribed medications, including the medication name and dosage.

9. Medications and Immunization

9.1. Overview of Medications and Immunizations

- The Medications and Immunizations section provides a comprehensive list of the patient's current, past, and completed medications, along with all vaccines administered. Users can view detailed information such as medication name, dosage, prescribing doctor, vaccine name, dose, and administration date.

9.2. Navigating through medications and immunizations

- To view medications, go to the Chartbook and click the *Medications* link. This section displays a list of the patient's current and past medications. Under the Current Medications section, you can view details such as the medication name, dosage, frequency and start date.

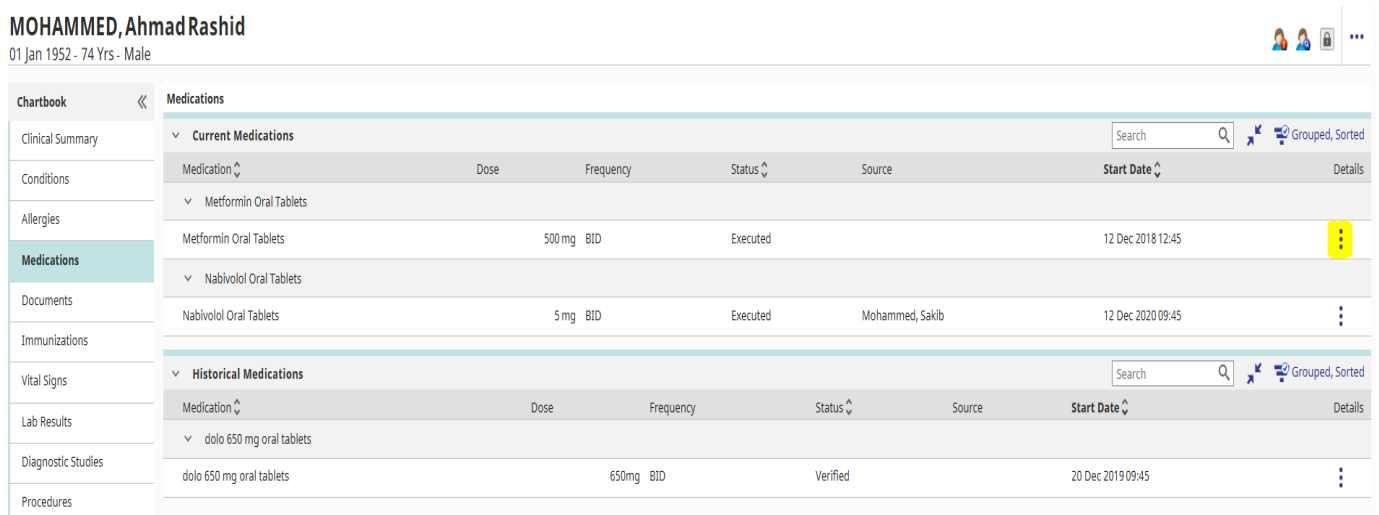

MOHAMMED, Ahmad Rashid
01 Jan 1952 - 74 Yrs - Male

10. Vital Signs

10.1. Overview of Vitals

- The Vital Signs section provides a structured grid displaying the patient's recorded vital measurements, including values, units of measure, and reference ranges. Users can review vitals by selecting a specific date or by clicking directly on a vital sign value to open the Observation page. This section helps clinicians quickly assess the patient's physiological status over time.

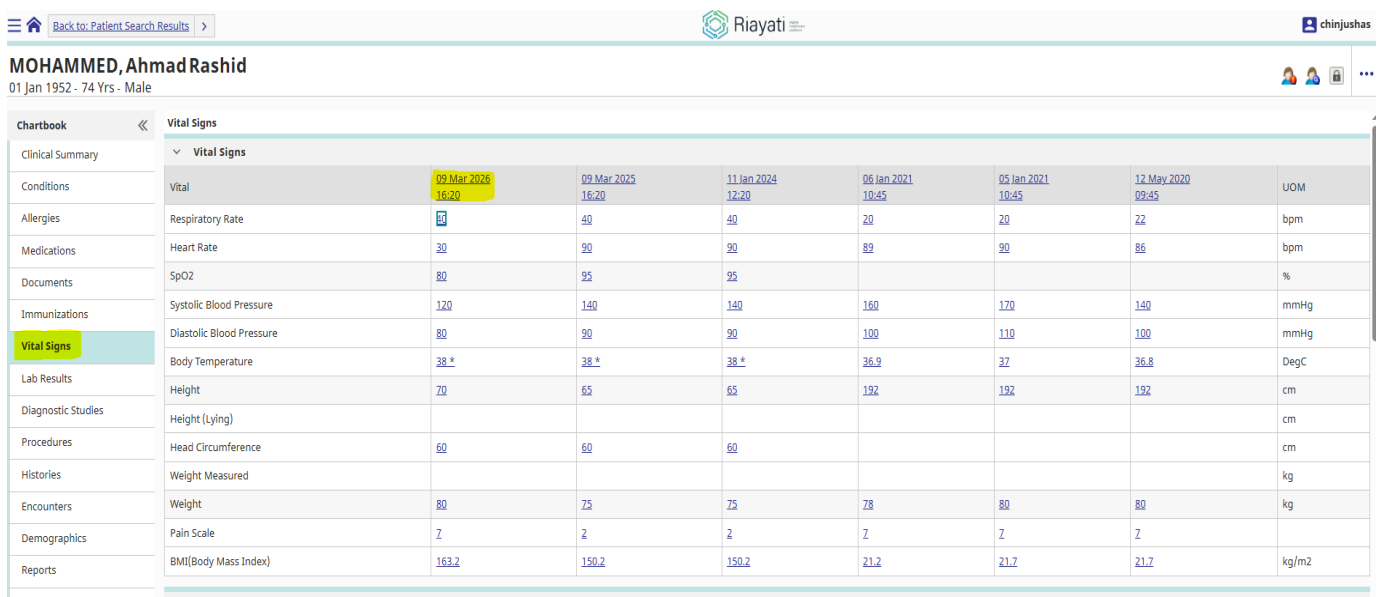

10.2. Navigation through vitals

- To view vital signs, go to the Chartbook and click the *Vital Signs* link. The patient's vital signs will be displayed in a grid format for easy review.

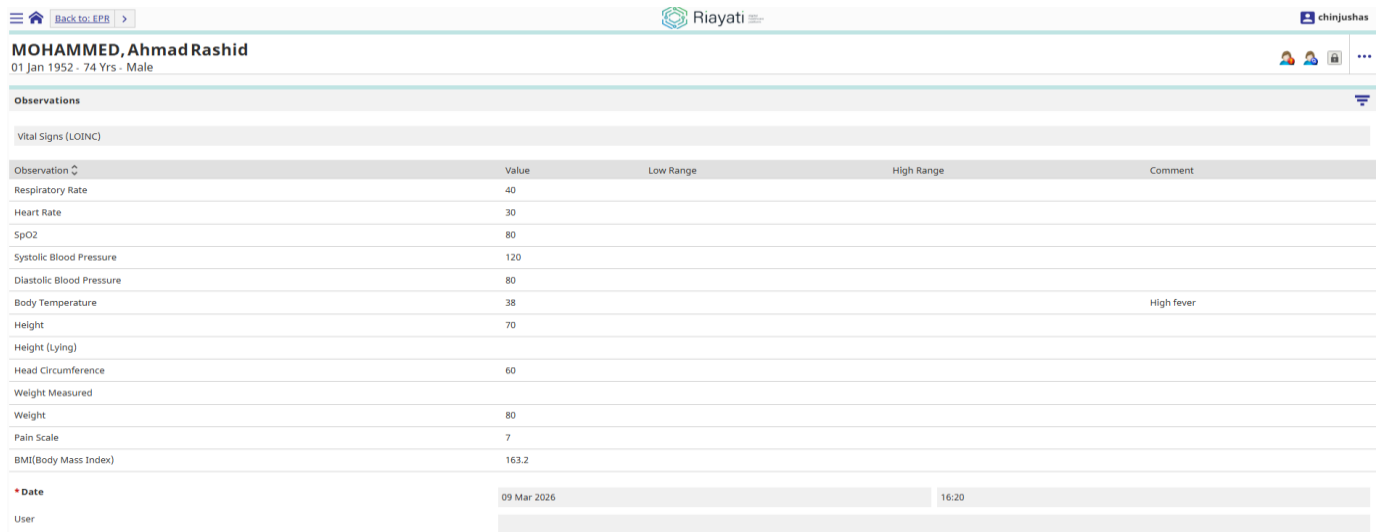

Vital	09 Mar 2026 16:20	09 Mar 2025 16:20	11 Jan 2024 12:20	06 Jan 2021 10:45	05 Jan 2021 10:45	12 May 2020 09:45	UOM

➤ You can also view the variations in vital signs using graphical representation under vital signs graph.

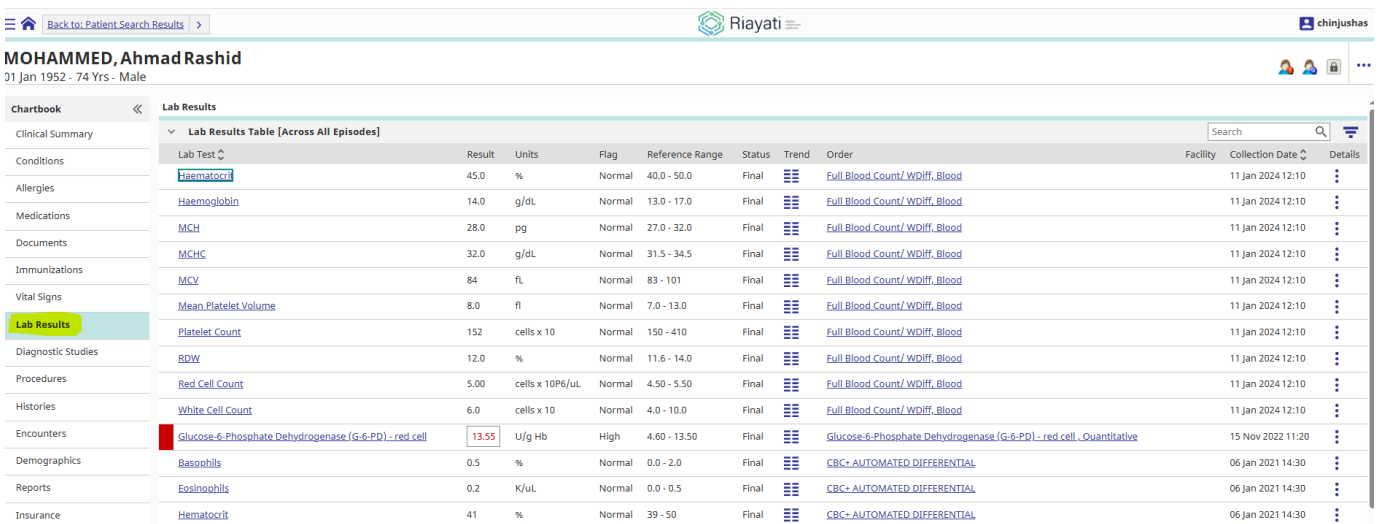

11. Lab Results

11.1. Overview of Lab Results

- The Lab Results section displays laboratory findings from biochemistry, hematology, and other diagnostic departments. Users can view results by test or by date, access detailed test information, explore cumulative trends, and use search or sorting tools to quickly locate specific data. This section provides a clear and organized view of all laboratory results associated with the patient.

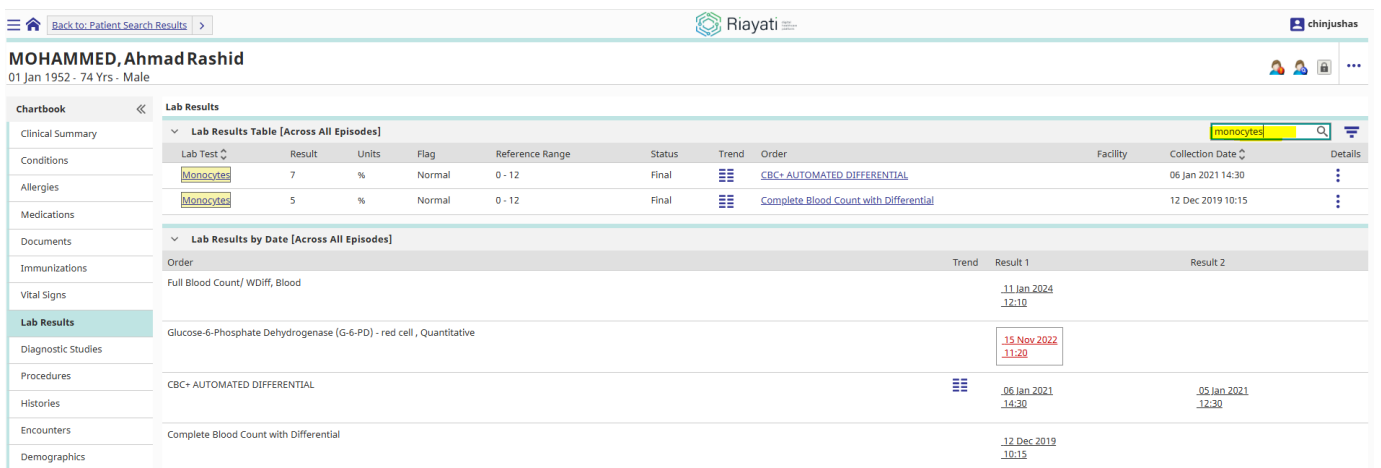

11.2. Navigating through Lab Results

- To view laboratory results, go to the Chartbook and click the *Lab Results* link. The Lab Results section includes results from biochemistry, hematology, and other general laboratory departments. Results can be viewed either by test or by date. In the Lab Results table, you can see key details such as the test name, result value, and reference range.

Lab Test	Result	Units	Flag	Reference Range	Status	Trend	Order	Facility	Collection Date	Details
Haematocrit	45.0	%	Normal	40.0 - 50.0	Final		Full Blood Count/ WDiff, Blood		11 Jan 2024 12:10

12. Diagnostic Studies

12.1. Overview of Diagnostic Studies

- The Diagnostic Studies section provides access to reports from radiology, pathology, and other diagnostic departments. Users can view study names, report links, and test dates, and open detailed reports directly through the document links. Search and sorting tools help quickly locate specific diagnostic studies based on name, date, or status.

12.2. Navigating through Diagnostic Studies

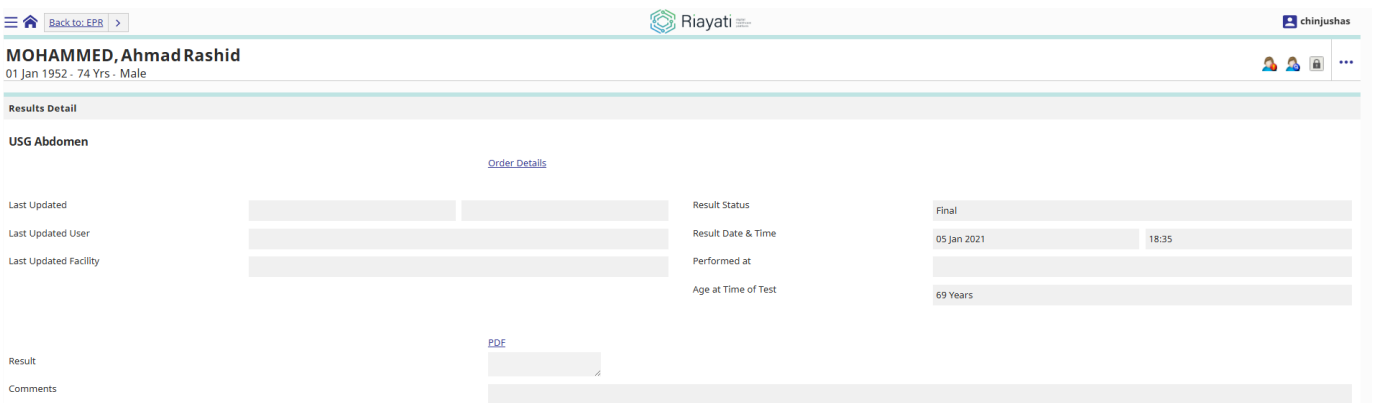

- To view diagnostic study reports, go to the Chartbook and click the *Diagnostic Studies* link. This section may include reports from radiology, pathology, and other diagnostic departments. Under Diagnostic Studies, you can view the test name, report link, and the date the test was performed.

The screenshot shows the 'Diagnostic Studies' section in the Riayati system. The patient is MOHAMMED, Ahmad Rashid (01 Jan 1952 - 74 Yrs - Male). The 'Diagnostic Studies' table lists the following studies:

Study	Ordering Clinician	Order Date	Test Date	Status
USG Abdomen	Dr Sakib Camel Mohammed	05 Jan 2021 18:35	05 Jan 2021 18:35	Final
Xray chest AP (Port)	Dr Naser Salem Hammad	03 Jan 2021 12:53	03 Dec 2020 12:45	Entered

- Click the report link to view the detailed results for the selected diagnostic study.

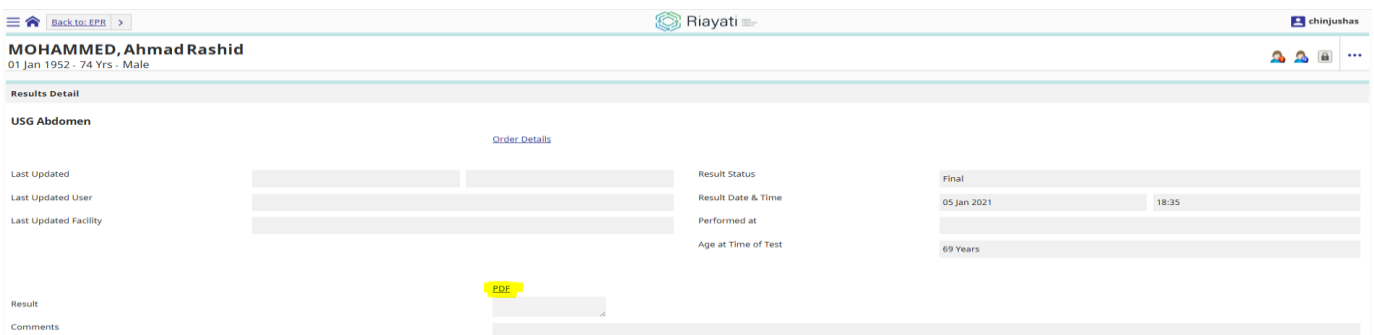

The screenshot shows the 'Results Detail' page for the 'USG Abdomen' study. The patient is MOHAMMED, Ahmad Rashid (01 Jan 1952 - 74 Yrs - Male). The page includes an 'Order Details' link and a table with the following information:

Field	Value
Last Updated	[Redacted]
Last Updated User	[Redacted]
Last Updated Facility	[Redacted]
Result Status	Final
Result Date & Time	05 Jan 2021 18:35
Performed at	[Redacted]
Age at Time of Test	69 Years

There is a 'PDE' link and a 'Result' field with a document icon.

- On the details page, click the document link to view the full diagnostic report

This screenshot is identical to the previous one, but the 'PDE' link is highlighted with a yellow box, indicating the next step in the process.

USG WHOLE ABDOMEN

Liver is normal in size, shape, contour and shows normal echogenicity with homogeneous echotexture. No focal SOL or dilatation of IHR seen.
 CBD is normal in calibre, measure approx. 2.9 mm.
 PV at porta measures approx. 10.6 mm in diameter, and shows normal respiratory variation in calibre.
 Gallbladder is well distended and shows normal wall thickness, with anechoic lumen.
 Pancreas appears normal in size, shape and shows homogeneous echotexture. MPD is not dilated. Peripancreatic planes are normal.
 Spleen is normal in size, shape and echotexture. No focal or diffuse lesion is seen.
 Right kidney measures 9.6 x 4.3 cm.
 Left kidney measures 9.1 x 4.1 cm.
 Both kidneys are normal in size, shape, position, outline and echogenicity. Corticomedullary differentiation is maintained in both kidneys, with normal cortical thickness. No calculus or hydronephrosis is seen on either side.
 Urinary bladder is normally distended and appears normal in outline, with normal wall thickness and echofree lumen. No perivesical pathology seen.
 Uterus is anteverted, with normal shape and myometrial echogenicity.
 No SOL seen. Endometrium is central and measures: 4.6 mm in thickness.
 No adnexal mass seen.
 No obvious lymphadenopathy seen.
 No ascitis seen.

IMPRESSION: No gross abnormality noted in present scan.
Please correlate clinically.

- To go back to previous menu, click on 'Back to Result Detail' link.
- Use the search bar to find reports by entering the study name, date, or report status.

13. Procedures and Documents

13.1. Overview of Procedures and Documents

- The Procedures and Documents section provides access to a patient's surgical history and essential clinical or non-clinical documents. Users can view procedure details such as the procedure name, date, and performing facility, and can access patient documents including reports, summaries, and forms. Search and sorting tools help quickly locate specific records, with additional document details accessible through the *Details* option.

13.2. Navigating through Procedures and Documents

- To view procedures, go to the Chartbook and click the *Procedures* link. This section lists the major and minor surgical procedures the patient has undergone. Under Procedures, you can view details such as the procedure name, procedure date, and the facility where the procedure was performed.

- To go back to previous menu, click on 'Back to EPR' link.

14. Histories

14.1. Overview of Histories

- The Histories section includes a patient's Social and Family History, providing details on habits, personal and occupational background, and family medical conditions. Users can view descriptions, onset dates, relationships, and source facilities, with options to search, sort, and expand sections for additional information. This section helps clinicians understand factors that may influence the patient's overall health.

14.2. Navigating through Histories

- To view patient histories, go to the Chartbook and click the *Histories* link. Social Histories include information about the patient's habits, personal background, and occupational history. Under the Social History section, you can view details such as the category, description, onset date, and the source facility.

15. Encounters and Demographics

15.1. Overview of Encounters and Demographics

- The Encounters and Demographics section provides an overview of the patient's visit history, including visit type, visit date, provider, and the facility visited. Users can search for encounters by visit type or provider and view insurance details through the *Insurance* header. This section helps quickly access key demographic and visit-related information for clinical review.

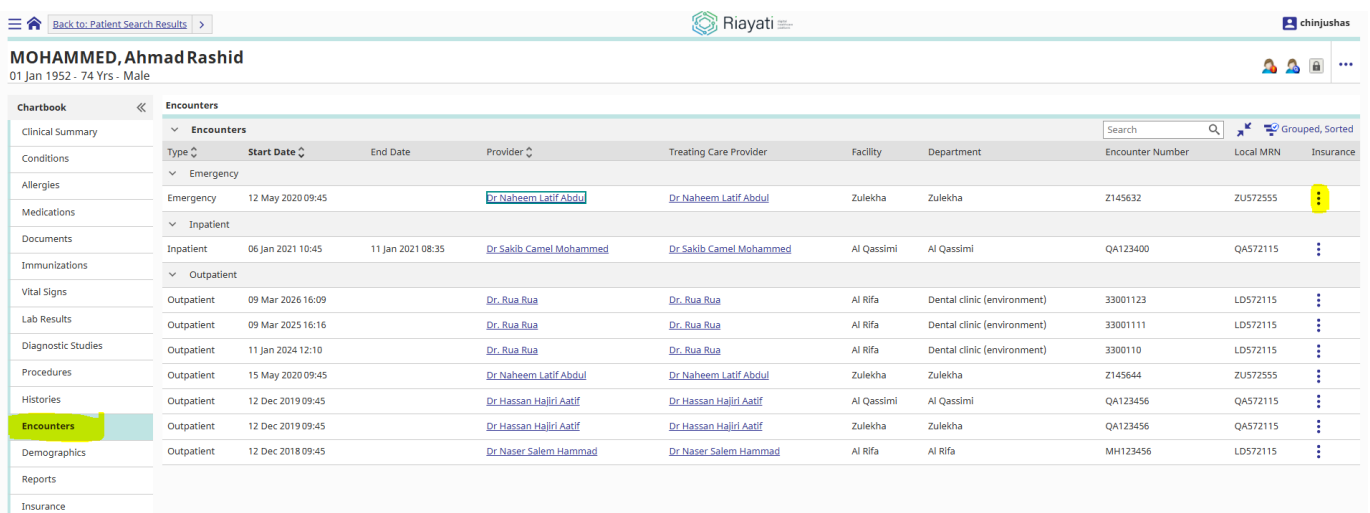

15.2. Navigating through Encounters and Demographics

- To view patient encounters, go to the Chartbook and click the *Encounters* link. The Encounters section provides information on the patient's visits to healthcare providers. Under Encounters, you can view details such as the type of visit, visit date, provider name, and the facility where the visit occurred.
